Coming up: EPOS-IP WP8 TCS Seismology full meeting, Potsdam, 6-8 May 2019

Monday, May 6, 2019 to Wednesday, May 8, 2019

Location:

Potsdam, Germany

With 15 beneficiaries and 3 associate partners, **WP8, EPOS TCS Seismology** is the largest work-package in the EPOS-IP project.

This, together with the agreed structure of EPOS Seismology along the three pillars 'waveform services', 'seismological products', and 'hazard and risk services' resulted in a rather compartmentalized organization of the work within the pillars.

After the WP8 kick-off in January 2016, the 2nd and likely final full meeting of WP8 will now happen in Potsdam, Germany, hosted by GFZ, during 6-8 May 2019.

EPOS Seismology will use this meeting to review and wrap up the activities of the last three years, to coordinate the final activities within the EPOS-IP project, and to look ahead towards follow-up actions and initiatives.
