

GNSS Data and Products presented at IGS Workshop 2018 in China

Date:

Thursday, January 31, 2019 - 16:00

The poster “New way of GNSS data dissemination within the European Plate Observing System (EPOS)” was presented by Jan Douša, member of [TCS](#) GNSS Data and Products, at IGS Workshop 2018, which has been held in China for the first time. Hosted and organized by Wuhan University receiving assistance from the State Key Laboratory of Satellite Navigation System and Equipment Technology and sponsorship from relevant partners, the event entitled “Multi-GNSS through global collaboration” occurred from October 29th to November 2nd. More information [here](#).
