2019 EPOS Seismology Workshop, ORFEUS Annual Meeting & EMSC GA in Grenoble, France, 7-10 October 2019

Monday, October 7, 2019 to Thursday, October 10, 2019
Location:
Grenoble, France

The 2019 EPOS TCS Seismology workshop will be held in Grenoble, France, on 7-10 October 2019, including the ORFEUS Annual Observatory Meeting and Workshop and the meeting of the EMSC General Assembly.

The workshop will take place at the campus of Université Grenoble Alpes, namely at the Institut des Sciences de la Terre (ISTerre) and at the Centre Technique du Papier (CTP).

The venue is easily reachable by public transport from the city center: tram stop "Bibliothèque universitaire" on line B.

The workshop will focus on the following thematic areas:

- Big Data in Seismology
- Real-Time Seismological Data Products
- Data Quality, Availability, Accessibility
- Current and Future EPOS Seismology Services

The workshop will comprise oral, poster and demo / hands-on sessions.

We anticipate invited lectures in all thematic areas by renowned European experts.
The preliminary oral program is available here.
The participation to the workshop is free of charge, including buffet lunches / breaks and a social event on Monday night at the Musée de Grenoble.

**The maximum number of participants is 120.**

Looking forward to meeting many of you in Grenoble this fall!
