First Consortium Board Meeting & Official Launch of the Thematic Core Service for Anthropogenic Hazards (TCS AH)

Glenda Jones
Keele University
United Kingdom

On the 18 and 19 Nov 2019, representatives from 12 pan-European institutions gathered at IG PAS in Warsaw, to attend the first TCS AH Consortium Board (CB) meeting and officially launch TCS AH following the successful end of the EPOS-IP Project*. Discussions regarding governance and final amendments to the Consortium Agreement took place with the democratic establishment of the TCS AH Hosting Organization (IG PAS), Director (Professor Stanislaw Lasocki, IG PAS), Chair (Gilberto Saccorotti, INGV) and Vice Chair (Ian Stimpson, KU). Work sections and leaders were also appointed and confirmed with sections for:

- The implementation of TCS AH Services – Leader: ACK – UST
- Administration, law & accounting – Leader: IG PAS
- Episode integration and application implementation – Leader: GFZ
- Promotion and dissemination – Leader: CNRS
- Projects & partnership – Leader: LTU

Preliminary work programs are to be prepared for January 2020, ahead of the of the EPOS-SP (Sustainability Phase) kick off in February 2020, with candidates for the following EPOS TCS AH committees also to be nominated in the interim;

1. **User Committee**
2. **Data Provider Committee**
3. **Innovation Advisory Committee**

The mission of TCS AH is to integrate research infrastructures within EPOS, for studies on anthropogenic hazards, particularly those related to the exploration and exploitation of geo-resources. The consortium will therefore maintain and further develop the TCS AH core services on the e-research platform IS-EPOS [https://tcs.ah-epos.eu/](https://tcs.ah-epos.eu/) by integrating new episodes, tailored software applications, and collaborative functions on the platform with work programs that also address;

- Interoperability between these services and the Integrated Core Service of EPOS;
- Promotion of the services, dissemination and outreach actions;
- Industry collaborations and brokering.

---

*This project has received funding from the European Union’s Horizon 2020 research and innovation programm under grant agreement N° 676564*
