

ARISTOTLE final meeting @ INGV, Rome, 17 January 2018

Date:

Wednesday, January 17, 2018 - 12:15

On January the 17th, 2018, the ARISTOTLE, All Risk Integrated System Towards Trans-boundary holistic Early-warning project has its final meeting at the INGV headquarters in Rome.

The ARISTOTLE project is a pilot project in the area of Early Warning System for natural disasters effectively started on February 1st, 2016, for a duration of 2 years.

During the final meeting the Task leaders present an overview of the project, and a summary of the reports to the Emergency Response Coordination Centre (ERCC), the EU coordination office for humanitarian aid and civil protection operations of DG ECHO (EU Humanitarian Aid and Civil Protection).

More information about the project in the [EPOS newsletter article](#) and in the [ARISTOTLE website](#).
