

EPOS @ 3rd GEO Data Providers Workshop at ESA in Frascati, Italy, 2-4 May 2018

Date:

Friday, May 4, 2018 - 11:00

The 3<sup>rd</sup> GEO Data Providers Workshop, hosted by the European Space Agency is organised at ESRIN (ESA), in Frascati, Italy, from 2 to 4 May 2018.

It brings together Earth observation data providers and users to share knowledge and best practices in the management and use of Earth observation data, while working together to enhance together the Global Earth Observation System of Systems (GEOSS).

The 3<sup>rd</sup> GEO Data Providers Workshop features 3 days of dynamic sessions, along with a 2 day hackathon, aimed at connecting data providers and users as part of the GEOSS Platform community. The 2-day hackathon takes place in two parallel sessions, one at ESA in Frascati, Italy and one at ESA ECSAT in Didcot, UK.

EPOS is a participating organization in GEO and it is effectively contributing to GEO by sharing the mission of fostering the sustainability of research infrastructures, interoperability and open science. The EPOS coordinator will attend the event.
